

# Package ‘dynGraph’

February 14, 2012

**Type** Package

**Title** Interactive visualization of dataframes and factorial planes

**Version** 0.99100403

**Date** 2010-04-03

**Author** Sebastien Le, Julien Durand

**Maintainer** Sebastien Le <sebastien.le@agrocampus-ouest.fr>

**Depends** R (>= 2.8.0), FactoMineR, rJava

**Description** Interactive visualization of dataframes and factorial planes

**License** GPL (>= 2)

**Repository** CRAN

**Date/Publication** 2010-03-08 15:39:09

### Description

dynGraph is a java application that allows to interact with the representation of scatterplots from a dataframe or from a multivariate analysis performed with the FactoMineR package

### Usage

```
dynGraph(res)
```

**Arguments**

`res`                `res` can be either a dataframe or results provided by a PCA, CA, MCA, MFA with the FactoMineR package

**Author(s)**

Sebastien Le and Julien Durand

**Examples**

```
library(FactoMineR)

data(wine)
dynGraph(wine)

data(decathlon)
res.pca <- PCA(decathlon, quanti.sup = 11:12, quali.sup=13)
dynGraph(res.pca)
```
