

Package ‘gregmisc’

February 14, 2012

Title Greg’s Miscellaneous Functions

Description The former gregmisc bundle is a repository for a variety of useful functions. The gregmisc package was recently split into a set of more focused packages: gdata, gmodels, gplots,gtools. The purpose of this ‘new’ gregmisc is to provide an easy way to access the original combined functionality. To this end, it simply depends on all of the new packages so that these will installed/loaded when this package is installed/loaded.

Depends gdata, gmodels, gplots, gtools

Version 2.1.2

Author Gregory R. Warnes.

Maintainer Gregory R. Warnes <greg@warnes.net>

License GPL-2

Repository CRAN
